

SPC Programme in Northern Mariana Islands

01/01/2016 - 31/12/2016

The following table lists key work areas that SPC is undertaking in 2016 cooperation with Northern Mariana Islands. The country-specific work listed here complements other SPC work undertaken at a regional level to benefit the people of Northern Mariana Islands and achieve its national development priorities. SPC's key regional work is presented in the Pacific Community Results Report.

SPC expected contribution to national development goals			
Expected long term result (impact)	Expected medium term result (outcome)	Status	Outputs taking place or expected to commence this year
Sub-regional Level Work			
Pacific Communities are Empowered and Resilient			
Fisheries, Aquaculture and Marine Ecosystems			
Improved management of coastal fisheries	Enhanced capacity of coastal communities to respond effectively to climate change and improved assessment of climate change impacts on marine environments	On Track	Solutions for using mobile devices (phones, tablets etc.) for data collection with supporting databases developed
	Enhanced coastal fisheries management policies and systems based where possible on scientific assessments of the status of national coastal marine resources	On Track	Coastal fisheries creel and market survey manual printed and distributed along with species identification cards for 300 finfish species - Drafts of the Manual and the Finfish ID book completed and published
		On Track	Species specific user guide for finfish biological sampling developed
	Enhanced community-based approaches & national management arrangements, incorporation of ecosystem-based principles, and coastal fisheries legislation	Ongoing	Collaborated with partners, organisations/agencies in formulating funding proposals to support member countries
Ongoing		Effective partnerships with national / regional / international community based resource management practitioners developed and strengthened	
Pacific Island people reach their potential and lead long and healthy lives			
Public Health			
Improved health and well-being of Pacific communities	PICTs have access to high-quality information and evidence to inform policy and the delivery of core public health functions	Ongoing	Interactive map providing real-time information on epidemic and emerging disease alerts in the Pacific completed and updated weekly

SPC expected contribution to national development goals			
Expected long term result (impact)	Expected medium term result (outcome)	Status	Outputs taking place or expected to commence this year
The Pacific region and its people benefit from inclusive and sustainable economic growth			
Land resources			
Increased contribution from agriculture and forestry sectors to inclusive broad based economic growth	Increased capacity of PICTS to meet standards, guidelines and conditions for exports and domestic trade	On Track	Capacity building support rendered to Northern Pacific countries on the establishment of the Micronesia biosecurity plans; training provided
Statistics for Development			
Pacific national and regional statistics are accessible and are being utilised	PICTS are producing the agreed core set of statistics across key sectors including but not restricted to economics, population, CRVS, education and health, as required by their national plans and agreed upon regional and international reporting frameworks	On Track	Census and survey analytical reports include maps and visual representations of data (GIS maps); online GIS mapping applications (PopGIS) operated successfully and linked to PRISM website
